INTRODUCTION

This bulletin presents final population counts from the 1971 Census by official language and by language most often spoken at home.

Historical comparisons on the official language of Canada's population back to 1931 are shown in Table 25. The question on official language refers to the number of persons who reported they were able to speak either one or both of the official languages of Canada. This was determined through the following census question: "Can you speak English or French well enough to conduct a conversation?". It should be noted that persons indicated as speaking "English only" or "French only" may also speak other languages and have a mother tongue other than English or French.

An earlier report (Catalogue No. 92-725) provided classifications by mother tongue, i.e. the language first spoken in childhood and still understood. Data in that report should not be confused with the concept of language most often spoken at home, which was not asked in recent censuses prior to 1971, and which refers to the language presently being used most frequently by the person in his or her home. In the case of infants, this refers to the language commonly spoken in the home.

Complete data on official language, as well as all languages most often spoken at home for which separate figures are available from the 1971 Census tabulations are given for Canada and the provinces in Table 26. The remaining tables show a less detailed classification for other types of areas — urban and rural, census divisions, municipalities of 10,000 population and over, census metropolitan areas and other census agglomerations of 25,000 population and over.

Geographic terms used in this report are defined for census purposes as follows:

Urban: Includes the population living in: (1) incorporated cities, towns and villages with a population of 1,000 or over; (2) unincorporated places of 1,000 or over having a population density of at least 1,000 per square mile; (3) the built-up fringes of (1) and (2) having a minimum population of 1,000 and a density of at least 1,000 per square mile.

Rural: Includes all the remaining population.

Urban size groups: Each municipality classed as urban in (1) and (2) above is allocated to a size group according to its population size. However, each municipality (or part) lying within the urbanized core of a census metropolitan area or other census agglomeration is allocated to the size group of the whole urbanized core.

Rural farm population: Includes the population living in dwellings situated on a farm in rural areas. A farm, for census purposes, is an agricultural holding of one or more acres with sales of agricultural products of \$50 or more in the previous year. All persons living on such holdings in rural areas are classed as "rural farm" regardless of their occupation. Thus, the population living on "census-farms" would include some persons not connected with farming operations and who derive their income from non-agricultural pursuits. Conversely, it would exclude those farm operators and their families who do not live on their farm holdings (e.g., in a neighbouring town or village).

The information in this report was collected on a sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100 p.c. basis. *The latter figures, of course, represent the official population counts (see Catalogue Nos. 92-704 to 92-707).*

Ce bulletin présente les chiffres définitifs de population selon la langue officielle et la langue d'usage, au recensement de 1971.

Les comparaisons chronologiques sur la langue officielle de la population du Canada sont présentées au tableau 25 pour la période remontant à 1931. La question sur la langue officielle a permis de déterminer le nombre de personnes qui ont déclaré pouvoir parler l'une ou l'autre des deux langues officielles du Canada. La question était la suivante: "Connaissez-vous assez bien l'anglais ou le français pour soutenir une conversation?". Les personnes qui ont indiqué "Anglais seulement" ou "Français seulement" peuvent également parler d'autres langues et leur langue maternelle peut être autre que le français ou l'anglais.

Dans le bulletin n° 92-725, on a classé la population en fonction de la langue maternelle, c'est-à-dire la première langue apprise et encore comprise. Il ne faut pas confondre ce concept avec les données sur la langue d'usage (langue le plus souvent parlée à la maison), qui ont été recueillies pour la première fois en 1971. Dans le cas des enfants en bas âge, c'est la langue ordinairement parlée à la maison.

Le tableau 26 contient des données complètes pour le Canada et les provinces, sur la langue officielle et sur les langues d'usage pour lesquelles on peut tirer des chiffres des résultats du recensement de 1971. Les autres tableaux donnent une répartition moins détaillée pour les autres genres de régions: régions urbaines et rurales, divisions de recensement, municipalités de 10,000 habitants et plus, régions métropolitaines de recensement et autres agglomérations de recensement de 25,000 habitants et plus.

Voici la définition, aux fins du recensement, des termes géographiques utilisés ici:

Régions urbaines: Comprend la population vivant dans: 1) les cités, villes et villages constitués de 1,000 habitants et plus; 2) les localités non constituées de 1,000 habitants et plus et ayant une densité de population d'au moins 1,000 habitants au mille carré; 3) les banlieues bâties de 1) et 2) ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré.

Régions rurales: Comprend tout le reste de la population.

Régions urbaines par groupe de taille: Chaque municipalité urbaine mentionnée à 1) et 2) ci-dessus est classée selon le groupe de taille de sa population. Toutefois, chaque municipalité (ou partie de municipalité) constituant le noyau urbanisé d'une région métropolitaine de recensement ou d'une autre agglomération de recensement est classée dans le groupe de taille de l'ensemble du noyau urbanisé.

Population rurale agricole: Comprend la population vivant dans des logements situés dans des fermes dans des régions rurales. Aux fins du recensement, une ferme est une exploitation agricole d'une acre ou plus ayant vendu pour \$50 ou plus de produits agricoles au cours de l'année précédente. Toutes les personnes vivant dans une de ces exploitations situées dans une région rurale sont classées sous la rubrique "régions rurales agricoles", quelle que soit leur profession. La population des "fermes de recensement" comprend donc certaines personnes qui n'ont rien à voir avec l'exploitation agricole et qui tirent leur revenu de l'exercice d'activités non agricoles. En contrepartie, les exploitants agricoles et leur famille qui n'habitent pas leur exploitation agricole (par ex., ceux qui habitent une localité voisine) ne sont pas pris en compte.

Les renseignements de la présente publication ont été recueillis par échantillonnage. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données avaient été recueillies à 100 p. 100. *Bien entendu, c'est ce dernier chiffre qui représente le dénombrement officiel de la population (voir publications nos 92-704 à 92-707 au catalogue).*

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 92-722). Those users requiring this information *prior to the release of the introductory report* should contact the Census User Enquiry Service.

Par souci de confidentialité, les chiffres de 1971 publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

Les estimations de l'erreur quadratique moyenne des caractéristiques données dans ce bulletin n'étaient pas disponibles au moment de la publication. Elles seront disponibles dans le rapport introductoire de ce volume (n° 92-722 au catalogue). Les utilisateurs demandant ce renseignement *avant la publication du rapport introductoire* devraient s'adresser au Service-utilisateurs, Recensement.

Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Division, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. A standard User's Request Form on which to outline precise tabulation requirements and to request time and cost estimates may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.
